## Weekly report

Institut de physique du globe de Paris

Observatoire volcanologique et sismologique de Martinique

### Activity of Mount Pelée

---

Saint-Pierre, January 13, 2023 15:30 local time (GMT-4)

Between January 6, 2023 at 16:00 (UTC) and January 13, 2023 at 16:00 (UTC), the OVSM did not record **any earthquakes** above its instrumental detection threshold that could be attributed to a volcanic origin.

During the volcanic reactivation phases of volcanoes similar to Mount Pelee, it is usual to observe seismic activity that varies in intensity and frequency. For more details on longer-term observations and interpretations of volcanic activity, please refer to the monthly bulletins of the OVSM.

The alert level is currently YELLOW: vigilance.

The Director's office of OVSM-IPGP.

#### Informations

The reports of OVSM-IPGP are available at <http://www.ipgp.fr/fr/ovsm/actualites-communiques-publics-de-lovsm>. You can also find us on our Facebook and Twitter accounts. Locations of volcano-tectonic and tectonic earthquakes determined by the OVSM-IPGP are available in real-time at <https://renass.unistra.fr/fr/zones/les-antilles/>.
